Hey David,

Lori also wanted to add this updated re: the new treatment system to our newsletter too. See below.

For the second article (not Mathy's testimony on the history of the district) which is the EPA press release about the actual spill, I think I should add the sentence about the EPAs press release on Wednesday about putting in water treatment plans.

" According to a September 23rd press release, a portable, temporary treatment system will be located in Gladstone, CO to continue treating water discharged from the Gold King Mine during winter 2015-16. This system will replace temporary settling ponds constructed by the EPA in August 2015.

More information is available at the EPA website for the [Gold King Mine Spill](#). "

I have pictures of the temporary settling ponds and the
